

# Day 14-js

## Assignment:

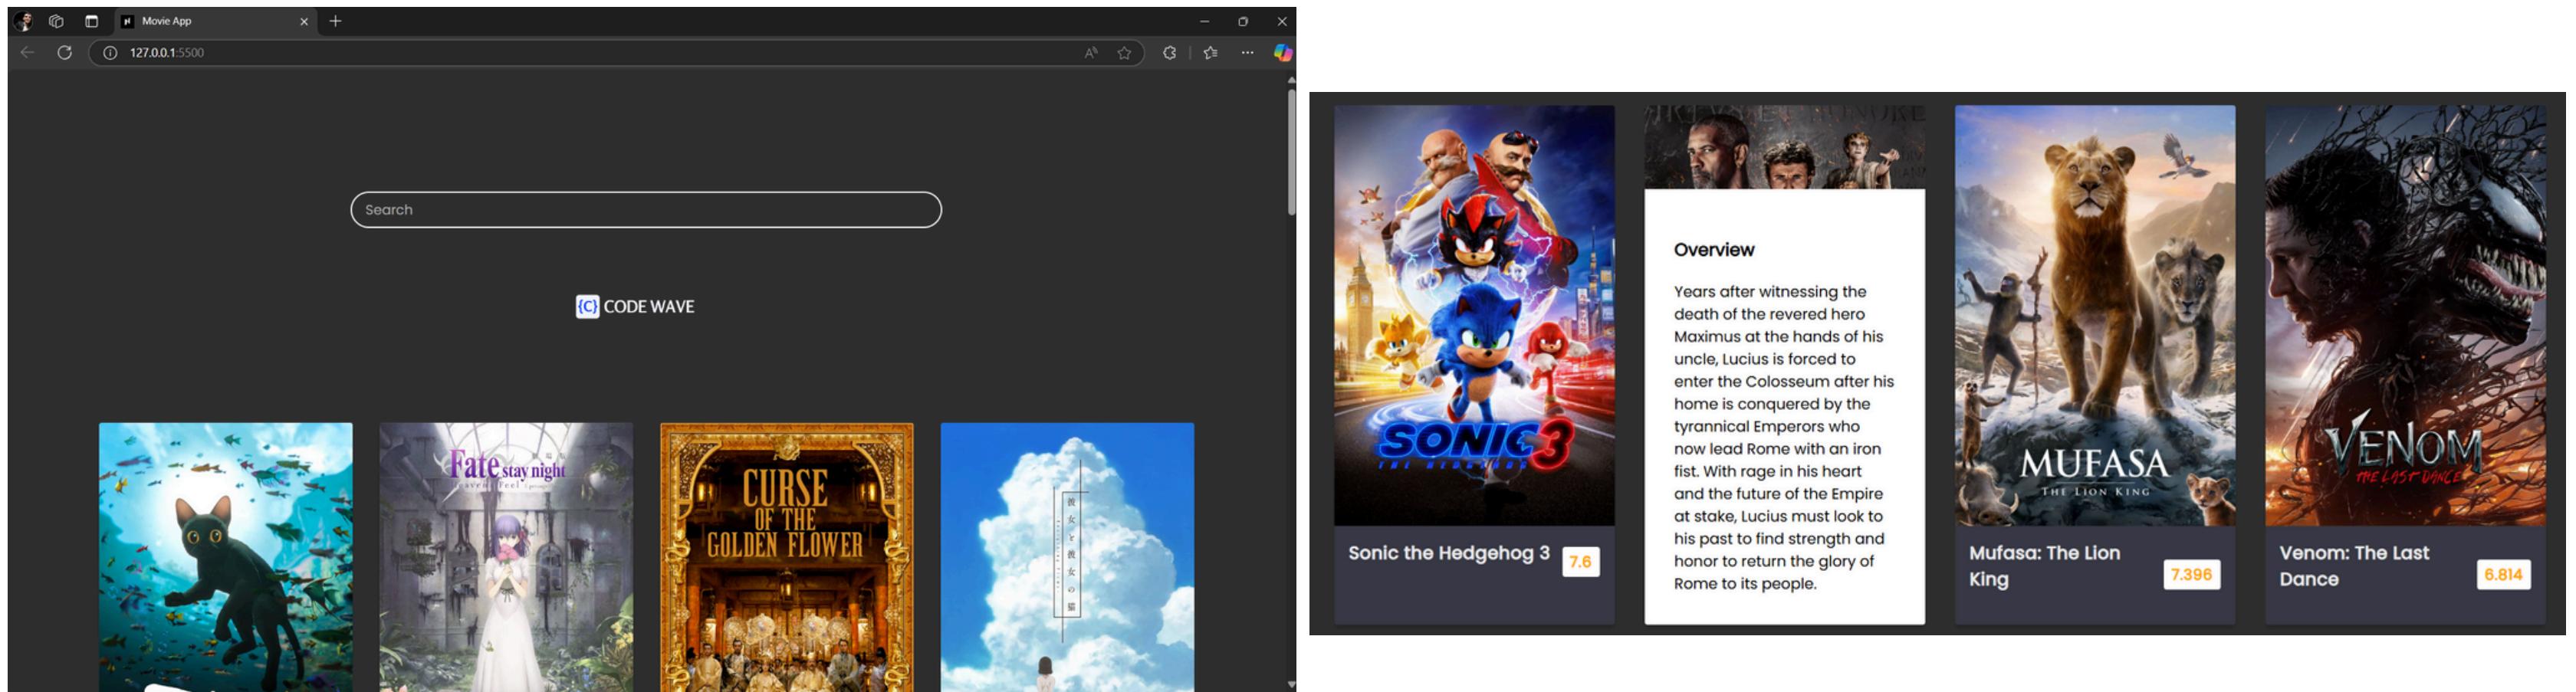

### Create a Simple Movie Website:

Your task is to build a simple website that displays movies using HTML, CSS, and JavaScript and interacts with the TMDB API to fetch movie data.

Steps:

1. Using TMDB API:

- Use this URL to fetch popular movies:  
[https://api.themoviedb.org/3/discover/movie?sort\\_by=popularity.desc&api\\_key=YOUR\\_API\\_KEY&page=1](https://api.themoviedb.org/3/discover/movie?sort_by=popularity.desc&api_key=YOUR_API_KEY&page=1)
- Use this URL for searching movies:  
[https://api.themoviedb.org/3/search/movie?api\\_key=YOUR\\_API\\_KEY&query=](https://api.themoviedb.org/3/search/movie?api_key=YOUR_API_KEY&query=)
