Assignment:

Report on Object-Oriented Programming Concepts
Write a report discussing the following OOP concepts:

1. Setter and Getter Methods
   - Explain what setters and getters are.
   - Provide an example of their use in Js.
2. Relationships Between Classes
   - Discuss Association, Aggregation, and Composition.
   - Provide examples of each using Js.

3. Inheritance
   - Explain the concept of inheritance and how it is used in Js.
   - Demonstrate it with a simple example.

Your report should include both theoretical explanations and practical examples.
 Use proper Js code snippets to illustrate each concept.
